

UNICLIC®
PATENTED TECHNOLOGY

FOR WALL PANELS

**REVOLUTIONARY
WALL-CLADDING SYSTEM**

Clicwall is a **glueless locking technology for wall panels**, using the innovative patented Uniclic technology. The **seamless joint system** offers a clean installation without the need for sanding, eliminating drying time and dust.

Dismantling and re-use on other locations is possible, making this technology the **ideal circular innovation**. The panels easily click into each other and are immediately finished making Clicwall up to **five times faster** than traditional wall-cladding systems.

CLICWALL VS PLASTERBOARD

Traditional plasterboard takes ten steps before the installation is complete, which **takes up a lot of time, tools and skills.**

1. Place the substructure
With metal studs or wooden structure
2. Mount plasterboard
20 to 25 fixing points per panel
3. Fill fixing holes and joints
4. Drying time
5. Smooth/sand joints and holes
6. Drying time
7. Apply primer coating
8. Drying time
9. Paint finishing colour
May require 2 coatings
10. Drying time

ClicWall offers instant finishing and can be **installed 5 x faster** than traditional plasterboard in two easy steps:

1. Place the substructure

With metal studs or wooden structure

2. Mount ClicWall

6 to 7 fixing points per panel

BENEFITS FOR CONSUMERS / INSTALLERS

- Simple and flexible product with fast installation
- Perfect solution for time sensitive projects (no drying time)
- All-in-one system: Clean, quiet and dust free installation (no need for paint or plaster)
- Circular innovation: re-usable wall panels
- Wide range of colors, designs and accessories

EASY INSTALLATION

The wall panels are installed by using an angular rotation movement

Long side faces: Innovative tongue and groove connection (Uniclic system slighted adapted for walls: only angling, no snapping)

Short side faces: The profile of the two short edges is square as the panels are placed from floor to ceiling.

ADVANTAGES OF CLICWALL

FAST & INTUITIVE INSTALLATION

LOWER ECOLOGICAL FOOTPRINT

DIY-FRIENDLY

CLEAN INSTALLATION

SUITABLE FOR ALL MATERIALS

INVISIBLE CONNECTIONS
