

 **DIGITOUCH**

## PRINTING & TEXTURING ONTO BOARDS

Digitouch is a **complete digital technology package for digital printing life-like designs and 3D textures** directly onto different core materials, such as HDF, vinyl, plywood, cork,...

Recent industrial inkjet printers produce very convincing reproductions of natural materials like wood and stone but people quickly spot the difference when the authentic 3D texture is missing. **Digitouch adds that real look and feel.**

Inventory costs are reduced incrementally and short and easy make-ready times improve productivity and even allow **make-to-order manufacturing.**

# DIGITAL SOLUTION FOR PRINTING LIFE-LIKE 3D TEXTURES ONTO BOARDS

## 1. Digital direct to board printing

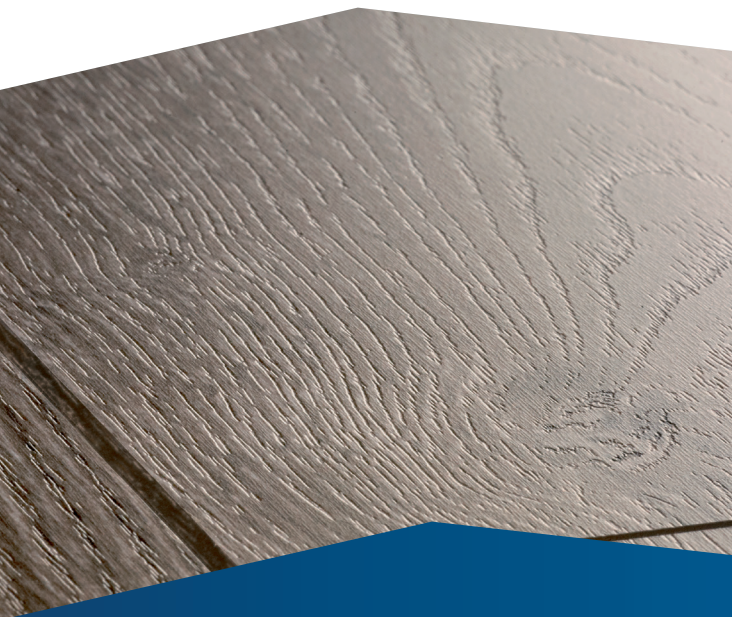

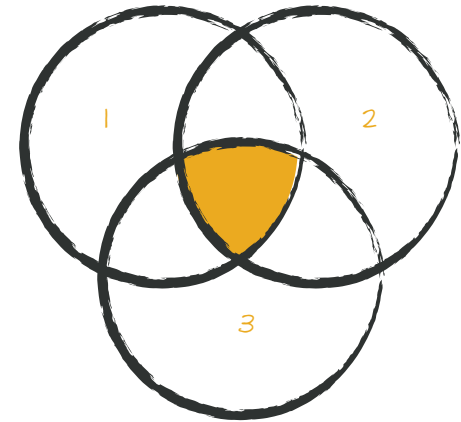

Available through different equipment manufacturers such as 

## 2. Compatible ink & texture chemistries

Available through different consumable manufacturers such as **ZEETREE**

## 3. Officially licensed technology

Digital printing technology package for direct to board printing by 

ENDLESS DESIGN FLEXIBILITY  
& PLANK FORMATS

PATENTED SOLUTION

COMPLETELY INTEGRATED  
DIGITAL SOLUTION

NO STOCKPILE OF PAPER  
OR CYLINDERS

IMPROVED PRODUCTION OUTPUT  
(LESS STANDSTILL, WASTE...)

LIFE-LIKE APPEARANCE  
AND TOUCH
