

FLINTILE

PATENTED TECHNOLOGY ®

GROUTABLE LOCKING TECHNOLOGY

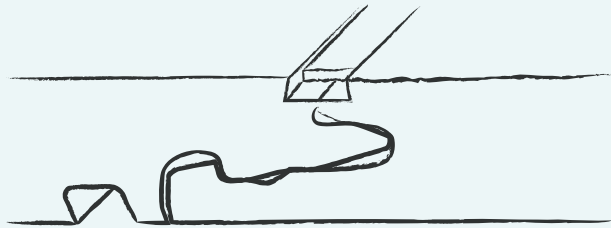

Installing rigid composite tiles with a ceramic look? It's easy with FlinTile, the **groutable locking system**.

This technology combines the advantages of grouted tiles with the advantages of a resilient flooring tile with locking system.

The joints of a SPC floor with Flintile locking are **100% waterproof**. The floating installation is possible on existing floors and enables a quick and clean installation that is walkable in less than a day.

WATERPROOF CERAMIC LOOK COMPOSITE TILES

FlinTile locking system ensures easy installation with **perfectly aligned edges**. The lightweight ceramic alternative technology does not only offer a ceramic look but also makes a floor **100% waterproof by using real grout**.
