

# UNIZIP

## one-panel herringbone locking technology

**HASSLE-FREE HERRINGBONE  
INSTALLATIONS**

Herringbone has made its comeback as a beloved flooring option. Through a unique, glueless locking technology, UNILIN now makes it easier than ever for you to get started with this trend at home. Forget about A-B or left-right panels: **with UNIZIP one plank fits all!**

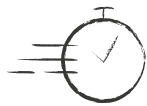

**FLOORING**

# Herringbone installation is no longer a puzzle

This innovative locking system resolves installation issues traditionally associated with a herringbone floor. There's no longer a need for two different sets of panels, ruling out mistakes and confusion along the way. With Unizip the short side of the panel can be locked into the long side of the adjacent panel. Manufacturing equipment is available via multiple suppliers.

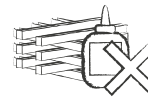

Why choose UNIZIP's locking system for your herringbone installation?

QUICK AND INTUITIVE INSTALLATION

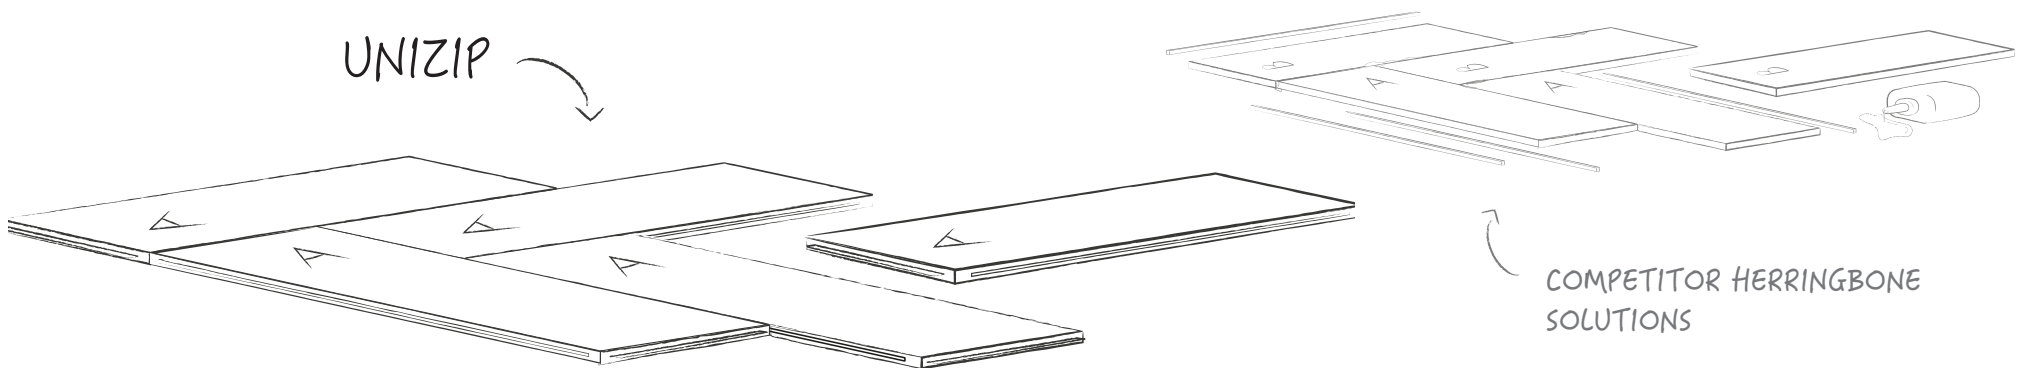

ONLY ONE TYPE OF PANEL

NO GLUE AND PLASTIC INSERTS  
REQUIRED

AVAILABLE FOR TONGUE AND  
GROOVE (T&G) FLOORING
