

# UNIDROP X

## Fold-down locking technology

**Easy one-piece fold-down installation for multiple floor patterns**

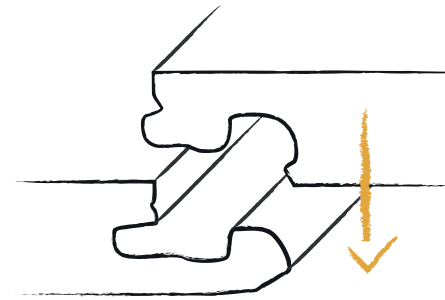

With Unidrop X, Unilin Technologies extended the popular one-piece fold-down locking technology **"Unidrop" to also be used for multiple floor patterns**, such as herringbone, chevron and various types of basket patterns.

This solution offers **superior locking performances** without the need of plastic inserts and is suitable for both resilient and laminate flooring materials. Unidrop X makes use of left and right sided panels that are easier than ever to install thanks to the fold-down locking mechanism. This ease of installation does not compromise the locking performances, making Unidrop X the strongest one-piece fold-down technology for multiple flooring patterns on the market today.

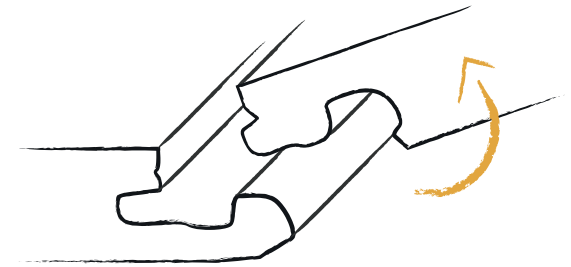

# How does it work?

The **short side click connection** of this technology **is made compatible with the long side click connection** of the adjacent panel, creating endless laying patterns for the installer. On top of that, the Unidrop X profile can be integrated in existing milling machinery without the need for additional investments.

Unidrop X offers an **intuitive and easy** way of **deinstallation** by simply angling up one panel, which prevents profile damages that often occur with traditional one-piece fold-down technologies.

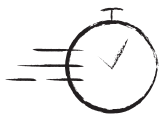

INSTALL

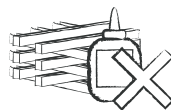

DEINSTALL

## Why choose Unidrop X?

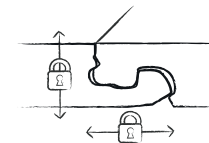

QUICK AND INTUITIVE

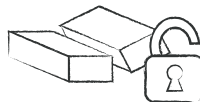

NO GLUE AND PLASTIC  
INSERTS REQUIRED

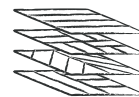

BEST TECHNICAL PERFORMANCE OF  
ALL FOLD-DOWN LOCKING SYSTEMS  
(NOW ALSO FOR FLOOR PATTERNS)

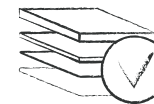

COMPLETE HORIZONTAL AND  
VERTICAL LOCKING  
AT THE SAME TIME

ANGLE OUT TO DEINSTALL

MULTIPLE PATTERNS POSSIBLE

SUITABLE FOR ALL MATERIALS
